
Installation Guide

Group 8 - CZ4031: Database System Principles Project 1

Download Our Chosen IDE

Download IntelliJ Community Edition:

<https://www.jetbrains.com/idea/download/#section=windows>

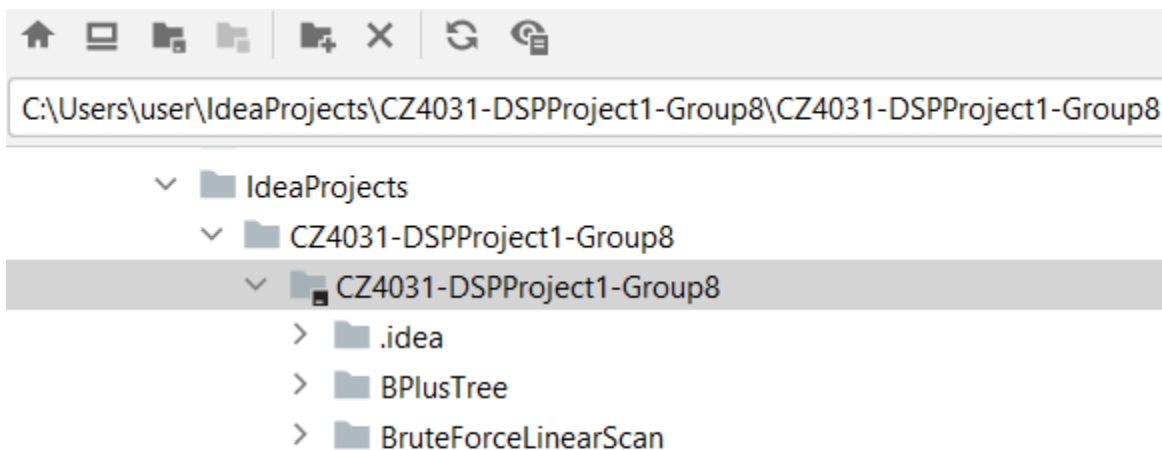

Do take note of the directory of where your projects will be saved.
E.g. C:\Users\user\IdeaProjects

Download Our Project

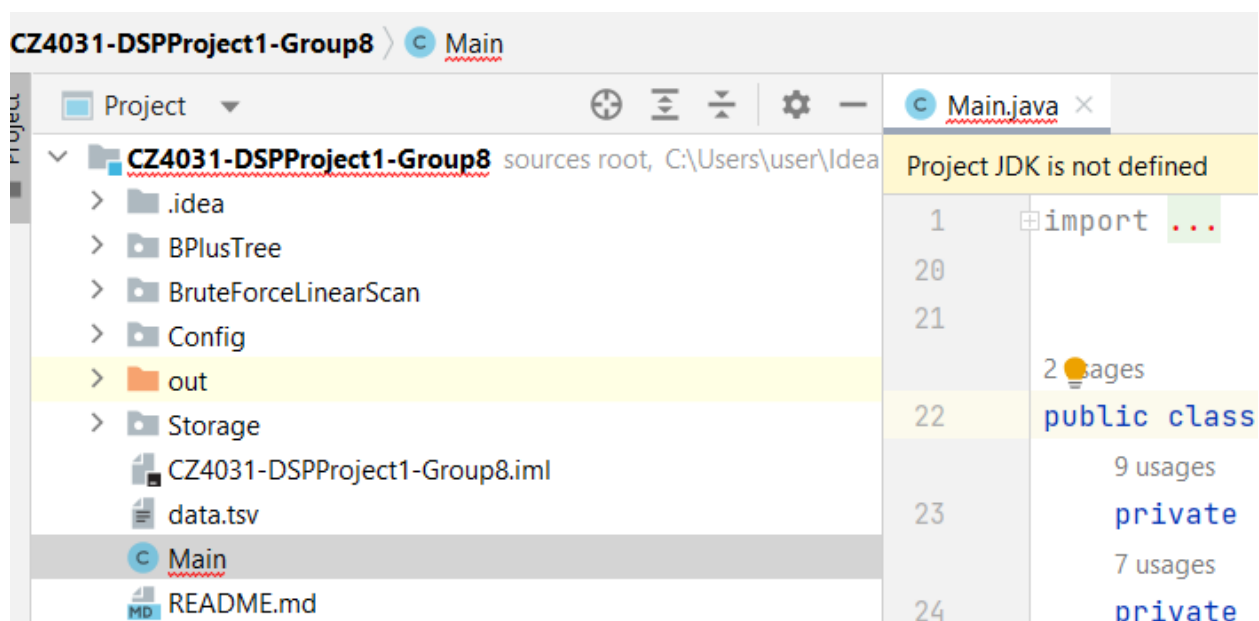

1. Download the Group 08 - CZ4031 Project 1 Submission.zip file that was submitted on NTULearn, and unzip it.
2. Inside the unzipped folder, the source code for our project is named CZ4031-DSPPProject1-Group8.zip, put it into your IdeaProjects directory.

Set Up Your Environment

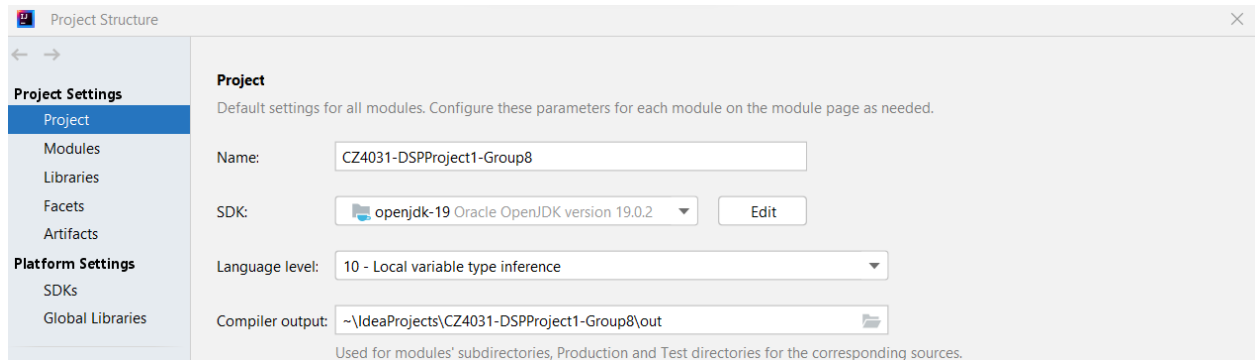

1. Unzip CZ4031-DSPProject1-Group8.zip file.
2. Open IntelliJ:
 - a. Click on the  button on the top-right hand corner.
 - b. Find your IdeasProjects directory and select the unzipped CZ4031-DSPProject1-Group8 folder.

3. Once you have successfully loaded the project, you will see this error and have to define your Project JDK.

4. On the top navigation bar, go to File > Project Structure and make the following changes to the SDK and Language Level:

5. Once you apply the changes, open `Main.java`, and run the code on the IntelliJ interface by clicking on the  on the top navigation bar.
